- global distribution of power, wealth and justice
- international agencies and global cooperation

Ways of Life in Asia, Africa or Australasia (one community study)

- elements of societies and cultures
- the natural environment
- history, politics, and the economy

Human impact in Europe or the Americas (one community study)

- geography
- environmental impact, consumerism, and sustainable development
- urbanization
- historical influences
- living in the global village

Evaluation:

Your child's learning and progress will be assessed in many ways. I will look closely at their learning by collecting samples of work, assigning tests and quizzes, and listening to them in conversations regarding the content we are studying.

Your child's progress will be reported under three areas of learning:

- **Knowledge and Understanding:**
What does your child know and understand about the social studies themes and topics?
- **Research and Communication:**
How does your child gather, organize and share ideas in social studies?
- **Critical Thinking and Citizenship:**
How does your child apply social studies learning as a citizen in her/his community, Canada, and the world?

Student expectations:

-Attend class regularly

-Be on time for class

-Come to class prepared (binder, paper, writing supplies, and any other items verbally requested the previous class)

- Complete assignments on time

-Be responsible, respectful, and safe to yourself, others, and property

-Behave appropriately to ensure that students are not preventing the teacher from administering the lesson, or disrupting other students' opportunity to learn

** Note: Any of the above information could change at any given time based on the teacher's discretion.*
